Art Unit: 3617

#### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election <u>without traverse</u> of Species A in the reply filed on 5/05/2005 is acknowledged.

# Specification

- 2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:
  - The members of arcuate truss assembly <u>pivoting in a plane coplanar with a portion of</u>
     the <u>hull</u> that is formed by the members, as recited in clams 1 and 15 (emphasis
     provided).

#### **Drawings**

3. The replacement drawings received on 5/05/2005 are approved.

#### Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1, 5. 7-12, 15, 19, and 21-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Buck (US 3,110,281 A).

Art Unit: 3617

Buck shows an arcuate truss assembly (figure 3) for varying the dimensions of a vessel hull [32] having a plurality of members [46] pivotally joined, and operatively arranged to extend and retract to vary the dimensions of the hull when the plurality of members are pivoted with respect to one another. A plurality of plates [20, 32] are arranged to cover the assembly from top and bottom when the assembly is fully extended (see figure 3). A flexible membrane [52] made of plastic covers the assembly in a watertight manner (col. 3, line 67). The members of the truss assembly pivot in a plane coplanar with a portion of the hull (figure 4).

Note: Applicant is once again reminded that the limitation "vessel" is not limited just to a boat, and can be broadly interpreted to mean any type of container wherein the walls of the vessel would comprise a hull of the vessel.

# Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 6 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buck (US 3,110,281 A) in view of Bullock (US 5,499,594 A).

Buck shows an arcuate truss assembly having a flexible membrane made of plastic (col. 3, line 67).

Buck, however, is silent on the plastic membrane comprising urethane.

Bullock shows a flexible membrane for a vessel hull that has varying dimensions. The membrane comprises urethane (col. 7, lines 19-24).

It would have been obvious for one skilled in the art at the time of the invention to use urethane for making the flexible membrane of Buck, as taught by Bullock, because such material is inexpensive and easily available, resists abrasion, and is well known for its durability.

# Allowable Subject Matter

8. Claims 2-4, 13, 16-18 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Response to Arguments

9. Applicant's arguments with respect to claims 1, 5, 7-12, 15, 19, and 21-26 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3617

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory-period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner 11. should be directed to Ajay Vasudeva whose telephone number is (571) 272-6689. The examiner can normally be reached on Monday-Friday 12:00 -- 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Joe Morano can be reached on (571) 272-6684. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
